## **New Dash Panel for 2004 and Up Hummer H3s Creates a Customized Interior and More Storage Space**

Phoenix, AZ – Daystar products has announced the release of a stylish and convenient new dash panel for the current generation Hummer H3 and new H3T. With this new panel it's now easier than ever before to mount electronic accessories and store small items that need to remain readily accessible.

The Hummer H3 is a unique vehicle that's equally at home cruising around town or hitting difficult trails. However, mounting accessories such as GPS units and satellite radio receivers to the windshield is being outlawed in more and more states, and finding a convenient place to mount these items is difficult due to the H3's dash design. Daystar's new dash panel provides an easy and legal way to mount these electronic accessories, and provides additional storage for items such as cell phones, sunglasses, and MP3 players.

The Hummer H3 dash panel was designed using the latest computer modeling software for a precision fit and finish. Its shape follows the lines of the existing dash for a factory look while not having any effect on visibility through the windshield. The panel simply snaps into an existing recess in the dash; installation does not require drilling, trimming, or disassembly of factory dash pieces. Not even hand tools are needed!

In addition to the new upper dash panel, Daystar offers a 2" leveling kit for the H3 and H3T as well as dash panels for a variety of other applications. Daystar also offers an extensive line of Comfort Ride Lift & Leveling Kits, replacement bushings, motor & transmission mounts, shock boots, and other off-road accessories for all other popular trucks and SUVs.

Daystar's products have been proudly manufactured in the USA since 1977. For more information on Daystar's extensive product line, log on to [www.daystarweb.com](http://www.daystarweb.com) or call 800-595-7659.
